BUILDING OPERATIONS

EIGHTH FLOOR,
DA COSTA BUILDING,
68 GRENFELL STREET,
ADELAIDE.
SEPTEMBER QUARTER 1961

SOUTH AUSTRALIA

A summary of building operations in South Australia from 1956/57 to September 1961 is shown in Table 1 of this bulletin. More detailed information concerning types of houses, other new buildings, employment in the building industry, and dwellings within Local Government areas, is given in Tables 2 to 7.

SCOPE

This Bulletin includes details of "New Buildings", which include Houses and Flats as well as the classes of building shown in Tables 3 to 5 plus major additions (£5,000 and over) to these buildings (other than houses), but excludes (1) minor alterations, additions, repairs, and renovations, and (2) all construction activity such as railways, bridges, earthworks, water storage, etc.

COMMENTS

Table 1 shows that 2,349 houses were commenced and 2,144 completed during September quarter 1961, an increase of 63 commencements and a decrease of 189 completions on figures for the previous quarter; in September quarter, 1960, commencements numbered 2,573 and completions 2,454.

During September quarter 1961 there were 155 flats commenced, 42 more than in June quarter 1961.

From July to September, 1961, fewer houses and fewer flats were completed than in the preceding three months, but more of each were commenced than in any quarter since September 1960.

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly the result of the unequal incidence of individual large contracts. In one case a single contract may be let for a large project thereby inflating values during the quarters covering commencement, construction, and completion of that project, but in another instance a number of small contracts may be let over a protracted period and thus have little apparent effect on the totals for the quarter. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations. The different unit values of new buildings commenced during different periods are shown in Table 5.

For the third successive quarter the number employed on all jobs of builders of new buildings (Table 6) declined. The number recorded as employed on 29th September 1961 was 33 less than that for 30th June 1961.

As shown in Table 7 a large proportion of home building continues to be concentrated within a few local government areas. During the quarter ended 30th September last 1,071 (84.4 per cent) of dwellings completed in metropolitan local government areas were in the Municipal Corporations of Burnside, Campbelltown, Enfield, Marion, Mitcham, Port Adelaide, West Torrens, and Woodville; of dwellings completed outside the metropolitan area 53.2 per cent were in the near metropolitan District Councils of Noarlunga, Salisbury (including the greater portion of Elizabeth), and Tea Tree Gully. Completions in the Whyalla Town Commission area accounted for a further 11.9 per cent.

DEFINITIONS

Values - All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also "Completions"). The values shown in Table 4 represent the value of work actually done on new buildings during the period.

Commencements - A building is recorded as commenced when work on the foundations has begun.

Under Construction - Once commenced, even though work on it may have been temporarily suspended, a building is classified as "Under Construction" until its "Completion" - see next paragraph.

Completions - A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-builder when the dwelling is either completed or occupied (whichever occurs first). However, the value shown in all cases is that of the building as a finished project as planned.

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
